Aesthetic dentistry
Enhancing the smile’s aesthetic appearance can lead to increased self-confidence, improved social skills, and even a more positive outlook on life.

Before

Brace are fitted around your teeth to shape and prevent the teeth from coming forward. Braces are made out of metal! you can choose different colour bands to go over the boxes and wires.

After

Tooth whitening
Reasons for tooth whitening:

- Fluorosis (excessive fluoridation during tooth development).
- Normal wear of outer tooth layer.
- Fluorosed teeth due to medications (tetracycline, etc.).
- Yellow, brown Fluorosed teeth.

**Crown**

- Reasons for crowns:
  - Broken or fractured teeth
  - Cosmetic enhancement
  - Decayed teeth
  - Fractured or large fillings
  - Tooth has a root canal

**Sealants**

- What are dental sealants?
  - Sealants are thin, plastic coatings painted on the chewing surfaces of the back teeth.

**Bridges**

- Bridges are very thin pieces of durable, tooth shaped porcelain that are custom made (for shape and color). They are bonded onto the front of teeth to create a beautiful and attractive smile.

**Veneers**

- Cosmetically, to create a uniform, white, beautiful smile
- Crooked teeth
- Misshapen teeth
- Severely discolored or Fluorosed teeth
- Teeth that are too small or large.
- Unwanted or uneven spaces
- Worn or chipped teeth

**Reason for a fixed bridge:**

- Fill space of missing teeth.
- Maintain facial shape.
- Prevent remaining teeth from drifting out of position.
- Restore chewing and speaking ability.
- Restore your smile.
- Upgrade from a removable partial denture to a permanent dental appliance.

**Children dentistry**

**Dental Implants**

- What are Dental Implants
  - A dental implant is an artificial tooth root replacement and is used in prosthetic dentistry to support restorations that resemble a tooth or group of teeth.

Implants consist of 3 parts - a special crown, a post, and an anchor embedded in the jawbone. Can also be used to anchor bridges or dentures.
